Day 2 Citizen Science

Sharing Work around Health and Sustainability -- Laying a Foundation

Topic: Taxonomy of cross-context phenomena (Citizen Science, Open Source, Open Knowledge Production, etc.)

- **What do we call people? (We started here)**
 - Leaders, Contributors, etc?
- What are the units of work?
- How is governance formed and implemented?
- What are quality processes?
 - E.g. Bugs, Vandalism, Bad data, etc.?
- Outputs (impacts?)
 - E.g. (data that goes into) Papers, (power structures that enable) Community Evolution, (encyclopedia for use in) Learning, (struct
- Articulation work (designing and evolving processes)
 - E.g. this is how you integrate upstream, this is how you report harrassment, this is how you become an administrator, etc.

Potential products:

- Survey mapping "paper-addresses-concept"
 - Consider: <https://socialmediacollective.org/reading-lists/critical-algorithm-studies/>
 - Consider publishing on WikiData (currently expanding to having an item for all notable papers)

Who needs to be part of this conversation?

Who do you know is missing?

What are the next steps to advance the conversation?

What are the resources you need?
