Day 2 OSS - Dean's Conference

Sharing Work around Health and Sustainability -- Laying a Foundation

Who needs to be part of this conversation?

- Community of Practice / Internet researchers
-
- Mozilla is good at surveys

Who do you know is missing?

(major platforms and organizations)

- GitHub,
- iNaturalists,
- Atlas of Living Australia,
- ECSA/ACSA/CSA - community representatives,
- Apache,
- FSF,
- SFC,
- Eclipse,
- Software in the public interest
- Arduino (open hardware)
- 18 F (office in GSA) - <https://sourcecode.cio.gov/>
- EU: The Directorate-General for Informatics is the Commission / <https://opensourceprojects.eu/>
- World Food Program
- UNESO - open source <https://en.unesco.org/foss> - Listed contact on UNESO: Davide Storti, Programme Specialist, Communication
-

What are the next steps to advance the conversation?

What are the resources you need?

- Funding

Funding Proposal: Diversity and Inclusion Technology and Governance Infrastructure for Open Collaboration

- > Survey while contributing / "in context"
 - > targeted questions
 - > demographics repository
 - > shared question/answer archive

Aims

1. Shipping Software
2. Plan for long-term continuity of maintenance
3. Pre-design privacy, user data use transparency, IRB language

Audience of Software

1. OSS Developers
2. Citizen Science Contributors
3. Researchers
